I am reading through https://github.com/spesmilo/electrum-docs/blob/master/xpub_version_bytes.rst

Encoding the script type in BIP32 extended keys is beneficial for wallets. For example, a watch-only wallet constructed from an extended public key would otherwise have to either [Read more](#) possible scripts in the subtree [1], or [2] prompt the user to enter the script type in a side-ch

mhowlett commented on Aug 15, 2018

It would be good to have some copy/paste security config examples in .net. Also, some 'recipes' for converting java configuration into the equivalent .net configuration.

For now:

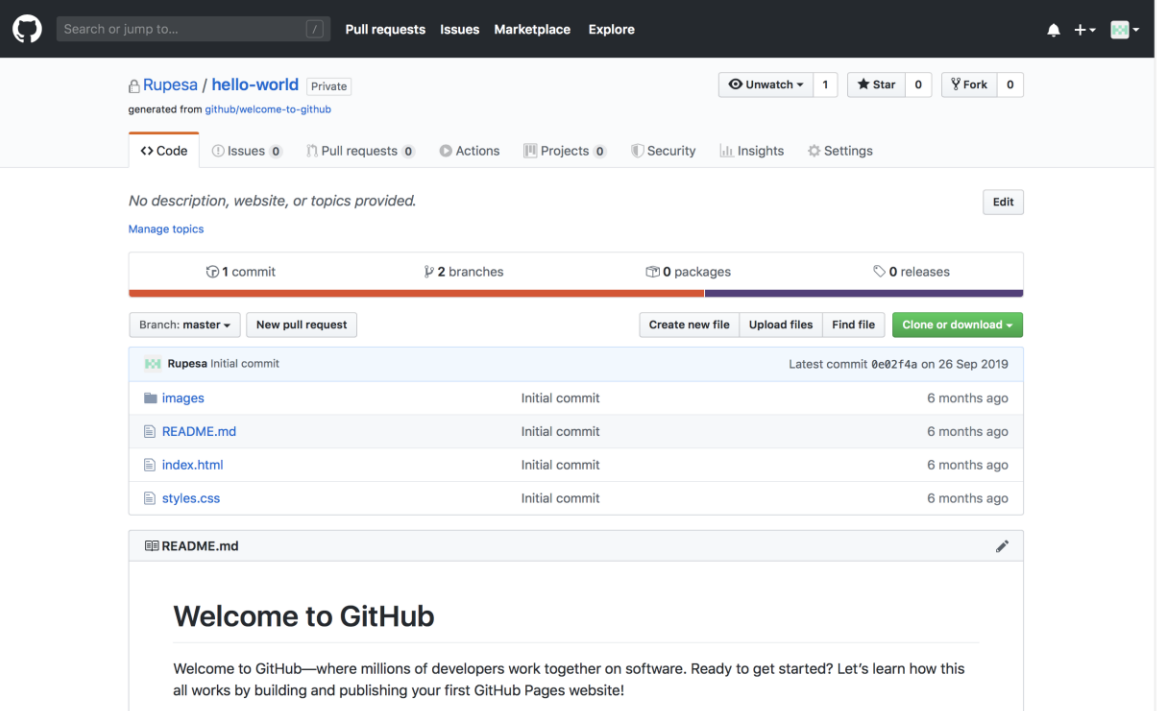

I've done some draft notes on SSL here: <https://github.com/mhowlett/confluent-kafka-dotnet/tree/security/examples/Security> [Read more](#)

Remove a branch

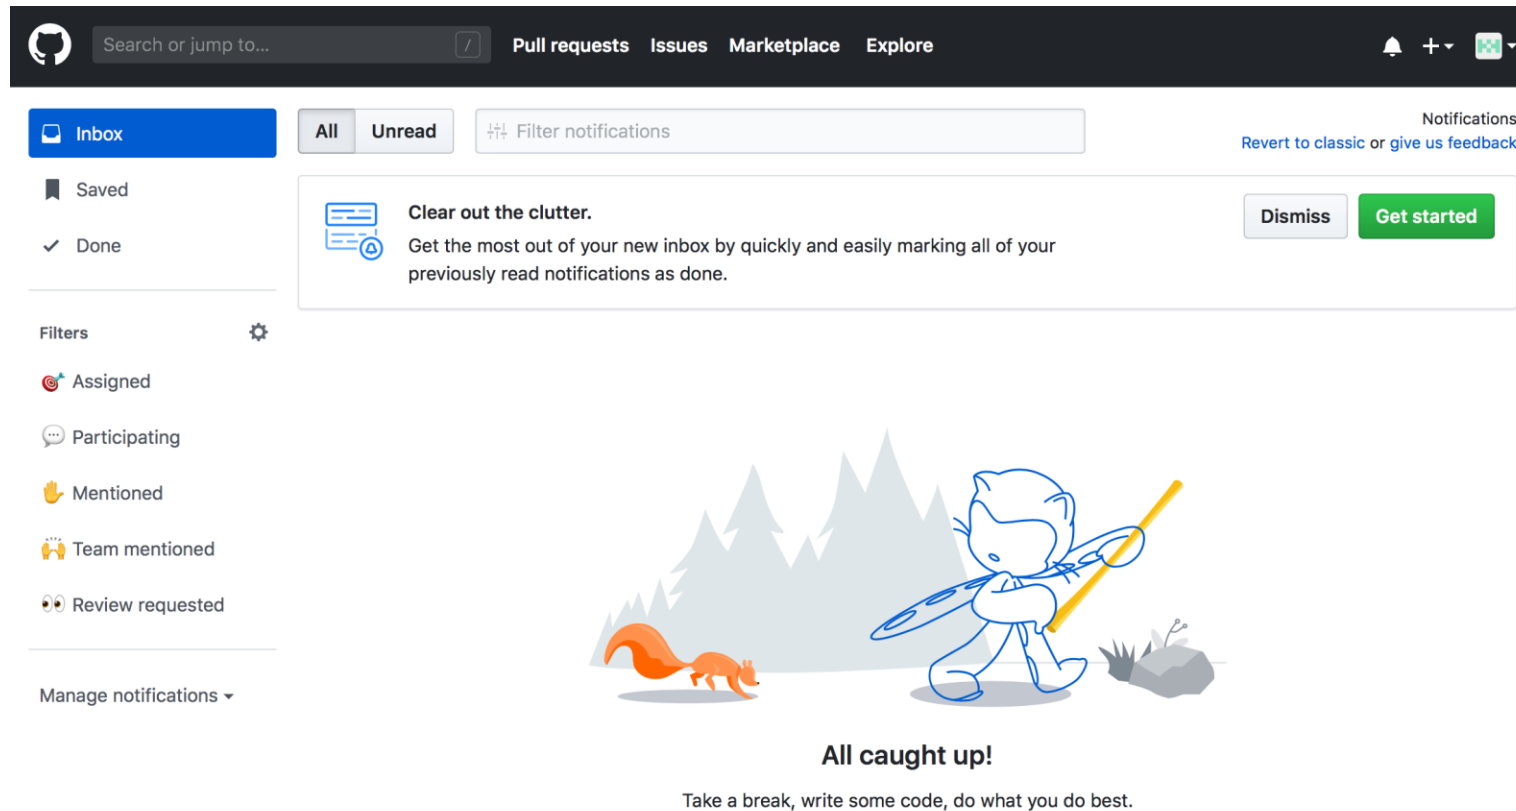

Task: Remove a branch from a repository.

User: Developer.

Issue: Missing a direct option to remove a branch.

Q: Will the user easily find the option to remove?

Repository Invitation

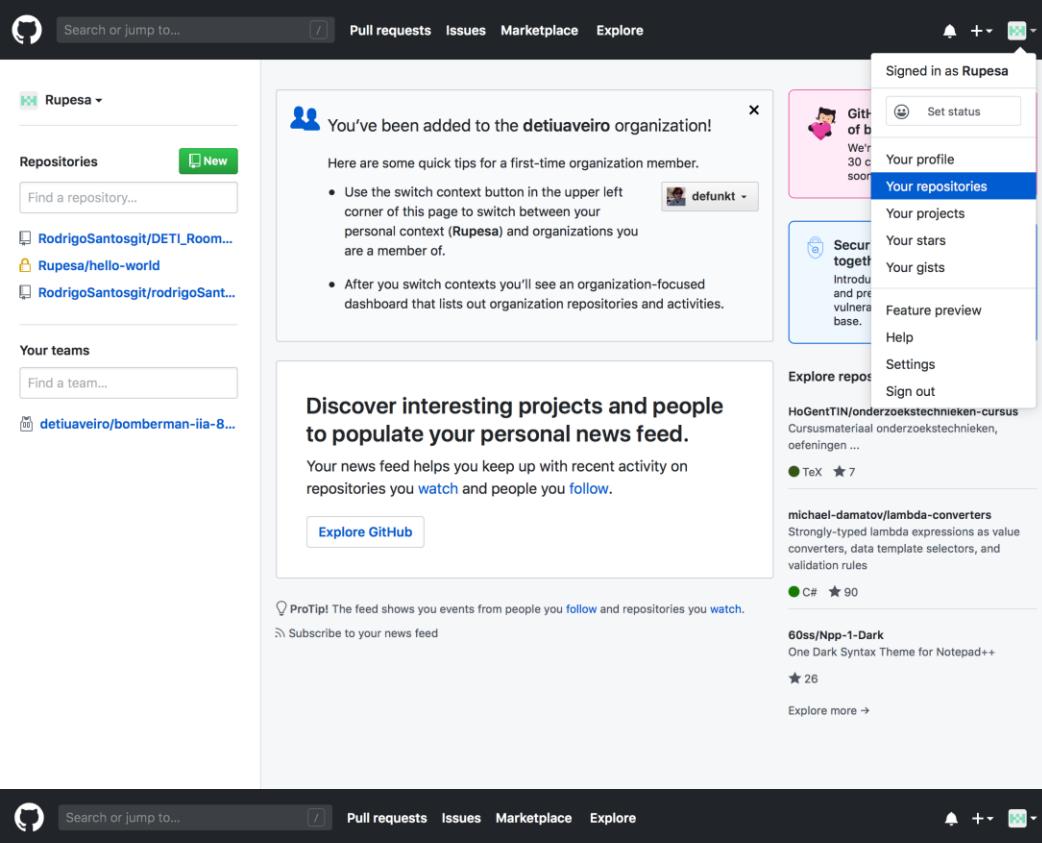

Task: Accept an invitation for colleague's repository.

User: Developer.

Issue: The invitation doesn't appear on the notifications.

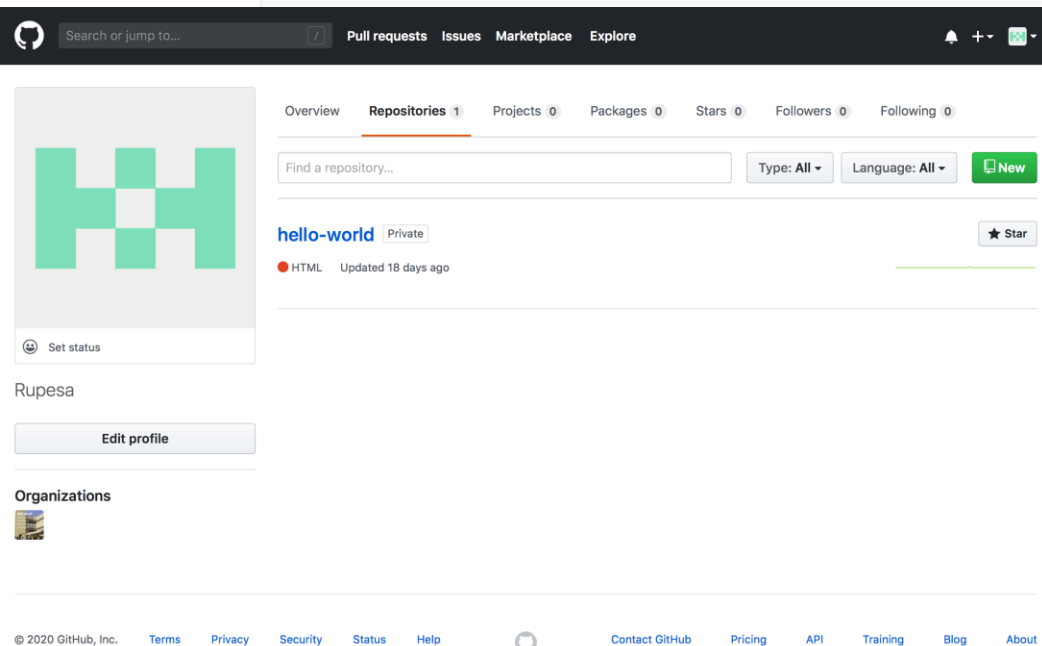

Q: Where can the user accept the invitation ?

Repository Collaboration

Task: Access the repository in which the user collaborates.

User: Developer.

Issue: The repository doesn't appear on the repository's menu.

Q: How can I enter on the repository where I am collaborating ?

Overall Experience

- Not a very friendly interface.
- It requires experience to know how to do some basic actions.
- Complicated ways to do some things.
- New users would lose a lot of time understanding where all the things are.
